

BUSINESS REQUIREMENTS

Customer wanted an entertainment & social networking based application that focuses younger generation and helps to manage the overall health of diabetics in a better way.

Our Solution

- ❑ Full-fledged Web Services API Management
- ❑ Social media integration; invites people from Facebook
- ❑ The solution includes two types of users: Players and followers
- ❑ Players can post their blood sugar level; it's called as a game
- ❑ Players can play 6 games a day, each expires in 2 hours.
- ❑ Followers can suggest medicines or incentives based on the player's sugar level.
- ❑ Points will be awarded for the users in each game, which can be used to buy candies or medicines from application store.

Technology Stack

Objective c, Xcode, ASIHTTP Request, Facebook API

Benefits
